Aqeel Abdul Rahman

UI/UX Designer | Enterprise Dashboards | AI Product Design

Dubai, UAE • +971 50 754 6406 • +91 94960 46406 • aqeelar512@gmail.com

Website: aqeel-ar.github.io • Portfolio: dribbble.com/aqeelar • linkedin.com/in/aqeelar

Professional Summary

UI/UX Designer specializing in enterprise SaaS and data-heavy dashboards for governance, risk and compliance (GRC). Contributed to the design of Jethur, an AI-enabled GRC platform used by government clients in Oman and Saudi Arabia, and played an important role in Jethur V2, working with cross-functional teams on Access Governance, Compliance and AI configuration. Well versed in AI tools for design, from prompt engineering, Figma AI and Figma MCP to Claude Code and Design, using them to prototype faster and turn client changes around within the same day. Computer Science graduate with hands-on ERP and enterprise systems experience, which helps me design for how business users actually work. Seeking UI/UX Designer roles in the UAE.

Core Skills

UX & UI Design: User Research, Journey Mapping, Information Architecture, Wireframing, Prototyping, Usability Testing, Heuristic Evaluation, Enterprise Design Thinking, Design Systems, Responsive Design, Dashboard and Data Visualization

AI & Product Design: AI-assisted product design, AI UX workflows, prompt engineering, AI evidence analysis UX, rapid prototyping, design iteration, UX writing, enterprise SaaS UX, Figma AI, Figma MCP, Claude Code and Design

GRC & Product Domain: Compliance Management, Evidence Management, Audit Workflows, Access Governance, Risk Management, Business Continuity, Incident Management, Enterprise SaaS

Tools: Figma, Canva, Adobe Suite, Jira, ServiceNow, MS Office Suite, Power BI, n8n

Collaboration: Stakeholder Management, Client Discussions, Cross-functional Collaboration, Agile UX, Lean UX, Documentation, Problem-Solving, Critical Thinking

Languages: English, Hindi, Malayalam, Arabic

Work Experience

UI/UX Designer | **Jethur GRC** | Riyadh, Saudi Arabia (Remote) *May 2026 - Present*

- Contributed to the design of Jethur, an AI-enabled GRC platform, and played an important role in designing Jethur V2, including the Access Governance and Compliance modules and the AI Configuration settings.
- Designed data-heavy GRC dashboards for government clients in Oman and Saudi Arabia, including a 25-KPI Risk Management dashboard, Segregation of Duties, Access Governance and ISO 27001 assessment, using heatmaps, gauges, drilldowns and pivotable tables to make dense compliance data easy to scan.
- Designed Base Watch, an interactive risk and compliance map covering 13 bases for a government client, with 3D, hex and outline map styles and views by access level.
- Collaborated with cross-functional teams to deliver exactly what the client asked for, working from BRDs and process specs, and flagged BRD gaps inside prototypes so open questions were visible before build.
- Delivered rapid prototypes of GRC screens and workflows for client review, using AI tools to speed up prototyping, and turned client change requests to existing dashboards around within the same day.
- Created brand and collateral designs for clients, including cover pages, login pages, report covers, newsletter covers and widgets, following each client's requirements and design language.

IT and ERP Support Specialist | **AI Moosawi Trading LLC** | Dubai, UAE *Feb 2025 - Jul 2026*

- First on-site IT and ERP administrator for a multi-location industrial supplier. Supported daily ERP users across sites and saw first-hand which screens, forms and workflows slowed people down.
- Handled user access, system configuration and basic deployments, and wrote the handover SOP for ERP tasks.
- Designed company profiles, service documents and internal materials in Figma and Canva.

Systems Engineer | **Infosys** | Mangalore, India *May 2022 - Jun 2024*

- Supported Torrid, a US retail client, at its distribution center. Built automated SQL reports that cut report generation time by 85% and reduced manual effort by 40%.
- Dealt directly with Torrid to resolve technical errors in its US warehouse systems, handling day-to-day client communication until each issue was closed.
- Kept system uptime above 97% and cut SLA resolution time by 30% by working with vendors and cross-functional teams.
- Wrote client reports, instruction manuals and operational documentation to business standards.

Selected Projects

Base Watch Risk and Compliance Dashboard: Real project for a confidential Saudi government client, covering 13 bases. Designed in Figma and built as an interactive HTML prototype. An interactive risk map shows each base at a glance, and clicking a base drills into its risk heatmap, corrective actions, compliance and treatment plan progress. Live demo with anonymised data: aqeel-ar.github.io/base-watch

Audit Dashboard for GRC Software: Scannable audit dashboard that turns dense audit data into clear status, trends and drilldowns.

Policy Management Dashboard: Dashboard mockup for managing policies, with refined component patterns and UI copy.

ArcConsulting Landing Page Revamp: Redesigned the landing page of a business consulting firm.

Industrial Website Hero Section with Scroll Animation: Hero section for an industrial company website, with scroll-driven animation.

eBike Mobile App: Mobile app design for an electric bike.

Education

Bachelor of Engineering, Computer Science *2017 - 2021*
Sahyadri College of Engineering, Mangalore, India

Certifications

- Figma UI/UX Design Essentials - Udemy
- Foundations of User Experience (UX) Design - Google
- Enterprise Design Thinking Practitioner - IBM
- Claude Academy: Claude 101 - Anthropic
- Claude Academy: Claude Code 101 - Anthropic

Additional Information

- Available for immediate joining.
- Open to onsite, hybrid and remote roles.
- Worked with teams and clients across the UAE, Saudi Arabia, India and the US.
- Have a valid UAE driving license.
